EXPERIENCE

Spreetail, Front End Engineer

MAY 2019 - PRESENT

- Primary contributor to Spreetail's design system, focusing on reusability and accessibility.
- Work directly with product managers to transform requirements into intuitive features for users.
- Created a shared, reusable, authentication method that simplified implementation and consistency across applications.
- Consistently collaborate with backend engineers to design backends for frontends.

Gallup, Front End Developer Intern

JUNE 2015 - APRIL 2019

- Developed new product landing pages aimed at converting traffic into sales.
- Created new components and tools that leveraged into a number of other projects, accelerating development progress.
- Used and contributed to style guides and other design documentation to maintain coherent information and interaction design patterns.
- Identified and eliminated website bugs to boost performance and improve the overall user experience.

EDUCATION

University of Nebraska Omaha — B.A., Marketing, Management

AUGUST 2017 - MAY 2020

Spark Boulder, Boulder, CO — Front End Web Development

SEPTEMBER 2016 - DECEMBER 2016

10 week long program aimed at learning front end web development fundamentals and applying them while working with a budding startup.

SKILLS

Web Platform

React, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries

CRA, Gatsby, Next.js, Redux, React Query, Tailwind CSS

Testing

Jest, React Testing Library, Lighthouse, Sonarqube

Miscellaneous

Git, New Relic, Storybook, .NET C#, Figma, Adobe XD

PROJECTS

Stock Lookup

A stock lookup app using Material UI and react-query to fetch finnhub.io API data.

Todo App

A basic todo app written in TypeScript utilizing local storage to persist data.

Koda

A high fidelity prototype of an app designed in Adobe XD.

INTERESTS

I enjoy chatting about baseball, movies, investing, design, and building awesome stuff with code.
