## EXPERIENCE

### **Gemini,** *Frontend Developer*

SEP 2021 - PRESENT

- Responsible for writing and maintaining complex state logic for the Gemini Credit Card application process, helping onboard thousands of users in less than 2 months.
- Wrote custom hooks to improve the maintainability and shareability of logic between developers.
- Work frequently with product managers and designers to implement product requirements.
- Scaffolded an admin web app to help maintain compliance in the ever changing crypto industry.
- Refreshed email templates with custom HTML & CSS.

### **Spreetail,** *Frontend Engineer*

MAY 2019 - SEP 2021

- Primary contributor to Spreetail's design system, focused on reusability and accessibility.
- Worked directly with product managers to transform requirements into intuitive features for users.
- Created a shared, reusable, authentication method that simplified implementation and consistency across applications.
- Consistently collaborated with backend engineers to design backends for frontends.

### **Gallup,** *Frontend Developer Intern*

JUNE 2015 - APRIL 2019

- Developed new product landing pages aimed at converting traffic into sales.
- Created new components and tools that leveraged into a number of other projects, accelerating development progress.
- Used and contributed to style guides and other design documentation to maintain coherent information and interaction design patterns.
- Identified and eliminated website bugs to boost performance and improve the overall user experience.

## EDUCATION

### **University of Nebraska Omaha** — *B.A., Marketing, Management*

AUGUST 2017 - MAY 2020

## SKILLS

**Web Platform**
React, JavaScript, TypeScript, HTML, CSS

**Frameworks & Libraries**
Redux, React Query, XState, Tailwind CSS, Chakra UI
